

Technical Bulletin

Sending out SARS-Cov-2 Nucleocapsid Total Ab, Qualitative and SARS-Cov-2 Spike Total Ab, Semi-Quantitative Testing

TO: Our Valued Clients

FROM: Wesley Kim, MD
Medical Director

DATE: December 18, 2024

SUBJECT: Sending out SARS-Cov-2 Nucleocapsid Total Ab, Qualitative and SARS-Cov-2 Spike Total Ab, Semi-Quantitative Testing

DLS will soon be transitioning to new Automated Chemistry platforms in the upcoming year to improve operational efficiency. The new instruments will no longer be supporting SARS-Cov-2 Ab testing. Due to this change in the availability for in-house testing coupled with low demand for these tests, DLS will no longer be performing SARS-CoV-2 Nucleocapsid Total Ab, Qualitative and SARS-Cov-2 Spike Total Ab, Semi-Quantitative Testing in-house.

Effective 12/29/24, all orders for SARS-CoV-2 Nucleocapsid Total Ab, Qualitative and SARS-Cov-2 Spike Total Ab, Semi-Quantitative Testing will be sent out to LabCorp Laboratories. Requests using the old order codes will be converted to the new send-out code.

The turn-around time for this test will be up to 7 days.

The following table summarizes the testing that will be available:

Test Name	Specimen Type	Methodology	Inactive Order Code	New Order Code	Test location	Turn-around Time	CPT
SARS-CoV-2 Antibodies, Nucleocapsid	<i>Preferred:</i> Serum in Serum Separator Tube	Electrochemiluminescence Immunoassay (ECLIA)	DLS 7203	WILDHREF/ LABCORP/ 164068/ Ambient	LabCorp	Up to 7 days	86769
SARS-CoV-2 Semi-Quantitative Total Ab, Spike	<i>Preferred:</i> Serum in Serum Separator Tube	Electrochemiluminescence Immunoassay (ECLIA)	DLS 7681	WILDHREF/ LABCORP/ 164090/ Ambient	LabCorp	Up to 7 days	86769
