

Adjusting Pop-up Blocker Settings in Safari on Mac OSX

Why do I need to adjust Pop-up Blocker?

Pop-up Blocker needs to be adjusted to properly display the log-in screen.

Requirements:

Mac OSX system running Safari 5.0.5 or higher.

*Screenshots may vary depending on version of Mac OSX and/or Safari.

1. Open Safari
2. Click "Safari" in the menu bar
3. Ensure a check mark is **not** next to the setting "Block Pop-Up Windows"
 - a. If there is a check mark next to "Block Pop-Up Windows" click the option and pop-up blocker will be disabled (the check mark will disappear).

We recommend turning the pop-up blocker back on after logging out of DLS Web Results.
