

Technical Memorandum

Clinical and Molecular Microbiology

TO: Physicians, Clinical Staff and Clients

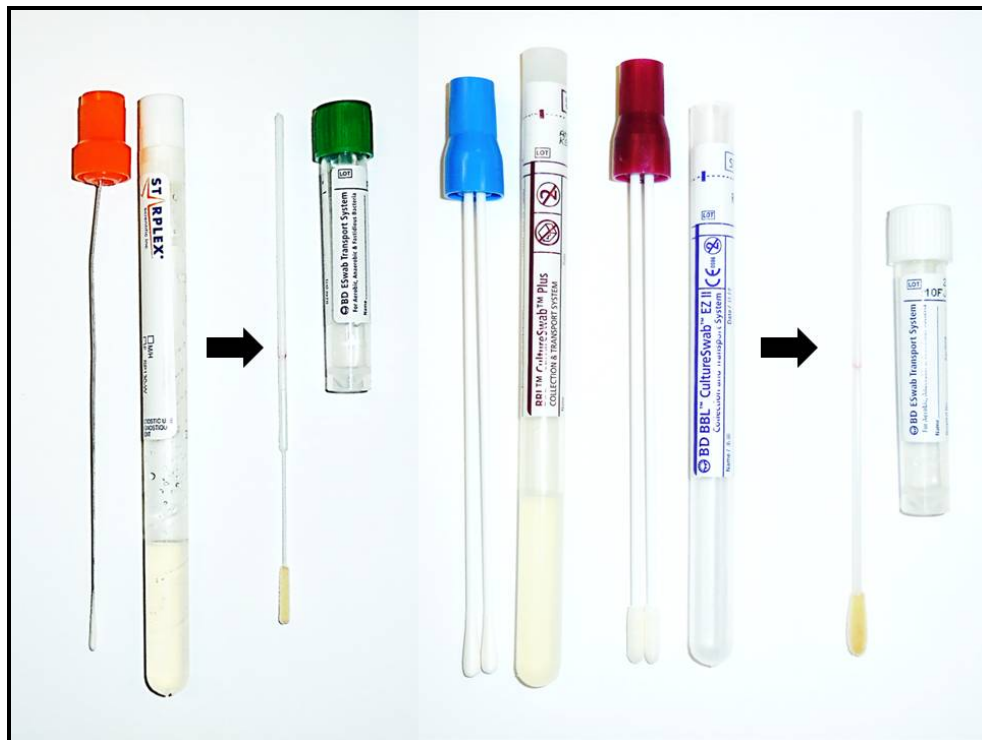

FROM: Dr. Matthew J. Bankowski, PhD, D(ABMM), HCLD/CC(ABB)
V.P. – Technical Director, Clinical and Molecular Microbiology and Infectious Disease

Terrie Koyamatsu, B.S., M(ASCP)
Manager, Clinical and Molecular Microbiology

DATE: September 19, 2014

SUBJECT: Change in bacterial transport media to the BD™ ESwab Transport System

The BD™ Liquid Amies Elution Swab (ESwab) Collection and Transport System (CTS) intended use is for the collection and transport of clinical specimens containing aerobes, anaerobes and fastidious bacteria from the collection site to the testing laboratory. The ESwab CTS will replace the current swabs as outlined in the accompanying figure.
